Lancasterian Primary School

A safe and welcoming learning community where:

- · we all aim high;
- everyone is included;
- creativity is valued.

Computing Curriculum Map

Autumn 2	Concepts & Approaches: Creating, Pattern, Logic, Algorithms, Decomposition, Collaborating Three Autumn themed activities which see the children explore patterns in Garlands Galore, create a leaf labyrinth and make Pumpkin Soup using computational thinking skills.	Software Busythings – Paintz.app Digital Painting To describe what different freehand tools do To use the shape tool and the line tools To make careful choices when painting a digital picture To explain why I chose the tools I used	Software Unplugged Digital Photography To know what devices can be used to take photographs To use a digital device to take a photograph To describe what makes a good photograph	Software Unplugged / Paintz.net Stop Frame Animation To explain that animation is a sequence of drawings or photographs To relate animated movement with a sequence of images To plan an animation	website had been hacked, how could you check the information on it is true? Software Various Websites We are researchers To understand how a search engine works. To be able to explore how a web crawler indexes the web To understand how to make a simple web search using keywords.	Software Various websites Vector Drawing To identify that drawing tools can be used to produce different outcomes To create a vector drawing by combining shapes To use tools to achieve a desired	Software Microsoft Powerpoint 3D Modelling To recognise that you can work in three dimensions on a computer To identify that digital 3D objects can be modified To recognise that objects can be

		Suggested Extended Abstract/Greater Depth Task: Create multiple phrases which show changes to text	learners from the previous year group.	To consider the benefits of desktop publishing Suggested Extended Abstract/Greater Depth Task: Create your own magazine cover and give reasons for your choice of layout and colour	To evaluate how changes can improve an image Suggested Extended Abstract/Greater Depth Task: Debate the risks and benefits of photoshopping images or not	through reshooting and editing To consider the impact of the choices made when making and sharing a video Suggested Extended Abstract/Greater Depth Task: Create own film using different types of shots, effects, and music	To design a project that uses inputs and outputs on a controllable device To develop a program to use inputs and outputs on a controllable device
		Software	Software	Software	Software	Software	Software
		J2E / Microsoft Word / Publisher	Microsoft Word / Powerpoint	Microsoft Publisher	Paint.net / Pixlr	iMovie	Micro:bit / Makecode
Summer 2	Concepts & Approaches: Tinkering, Persevering, Patterns, Logic, Decomposition, Debugging, Collaborating, Algorithms Children explore their surroundings and get creative, take a journey and make a map, and discover seaside tangrams, in these three fun activities.	Programming B: Programming Animations To choose a command for a given purpose To show that a series of commands can be joined together To identify the effect of changing a value To explain that each sprite has its own instructions To design the parts of a project Suggested Extended Abstract/Greater Depth Task: Create a program using own algorithm	Programming B: Quizzes To explain that a sequence of commands has a start To explain that a sequence of commands has an outcome To create a program using a given design To change a given design To create a program using my own design To decide how my project can be improved Suggested Extended Abstract/Greater Depth Task: Design own program using a variety of features e.g., recording, shrinking	Programming B: Events and Actions in Programs To explain how a sprite moves in an existing project To create a program to move a sprite in four directions To adapt a program to a new context To develop my program by adding features To identify and fix bugs in a program To design and create a maze-based challenge	Programming B: Repetition in Games To develop the use of count-controlled loops in a different programming environment To explain that in programming there are infinite loops and count controlled loops To develop a design which includes two or more loops which run at the same time To modify an infinite loop in a given program To design a project that includes repetition To create a project that includes	Programming B: Selection in Quizzes To explain how selection is used in computer programs To relate that a conditional statement connects a condition to an outcome To explain how selection directs the flow of a program To design a program that uses selection To create a program that uses selection To evaluate my program	Know that Ai uses information to help it make decisions Identify current everyday uses of AI Explain how a machine learning system works Explain how machine learning could be used to solve a problem Describe some positive and negative aspects of using digital assistants Consider how AI could be used in the classroom

				Suggested Extended Abstract/Greater Depth Task: Design a program which adds in a score variable to calculate how many sprites have been clicked on		
	Software	Software	Software	Software	Software
